**Cost / m<sup>2</sup>** \$1,250

**Time to complete** 4 months  
project approval  
to handover

**In the Media** Indesign Vol 39

KEB Australia Ltd is a subsidiary of Korean Exchange Bank, a specialised foreign exchange bank. It is the fifth largest bank in South Korea and head quartered in Seoul.

IDPM was selected due to our past experience in the building and based on a recommendation from our clients.

We designed the floor plate for front of house to take advantage of the sweeping views across the botanical gardens. We also maximised business efficiency with effective back of house planning.

KEB also had specific head office requirements and we integrated these requirements in the scope to ensure their international standards were met.
